Professional Summary

Frontend Developer with strong proficiency in React.js and JavaScript. Skilled in building responsive UIs, solving UI/UX problems, and integrating Firebase. Passionate about delivering scalable and user-friendly web applications.

Education

Front-End Developer, Masai School

(July 2024 - Present)

B.Tech in Information Technology

Sushila Devi Bansal College, BGI, Indore, Madhya Pradesh

Projects

Kitchen Recipe App

React, Firebase Auth, Firestore, Vite

A recipe-sharing platform where users can browse, search, and filter recipes.

Integrated Firebase Auth for secure login and Firestore for real-time recipe data. Added a live clock, theme toggle, and responsive UI.

Live App | GitHub

Employee Management System

React, Supabase, Tailwind CSS

Solo project to manage employee records with real-time updates and role-based dashboards.

Implemented task tracking, leaderboard, analytics, and Firebase login with protected routing.

Live App | GitHub

Doctor Appointment App

React, Firebase, Firestore

Developed a simple appointment booking system with login/signup features.

Users can book appointments, and doctors can manage time slots with real-time data updates.
